National Health and Aging Trends Study (NHATS)

Round 14 Clock Drawing TIFs

README FILE

The National Health and Aging Trends Study (NHATS) includes a clock drawing as one of several cognitive assessments. Sampled Persons (SPs) are asked to draw a clock on a blank piece of paper and set the hands to show 11:10 (10 past 11).

DATA FILE

NHATS_R14_ClockDrawings.zip is the file containing TIFs of the original clock drawings. Each TIF file name is the SPID (NHATS Sample Person ID) of the study participant.

CLOCK SCORING

NHATS also provides a score for each clock as a derived variable on the SP file (cg14dclkdraw). Details on NHATS scoring for the Clock Drawing Test are found in the NHATS User Guide, *Section III.K Scoring Methodology for Clock Drawing Test.*

ADDITIONAL DOCUMENTATION

Additional documentation about the clock drawing activity is available on the NHATS website (www.nhats.org), including data collection procedures, technical papers, and survey instruments.
